

Digiotouch

Sustainability Intern

About the role

We are looking to hire a sustainability intern to join our expanding team at Digiotouch. You will be responsible for:

- Support to Life Cycle Sustainability Assessment (LCSA) analysis based on ISO 14040-44 for various project related to circular economy.
- Support to data collection needed for the LCSA.
- Perform different scenario analysis and tradeoffs between the different life cycle dimensions.

Here are some key points with which the ideal candidate should identify with:

- Bachelor's or Master's degree student in environmental science or engineering;
- Data Analysis skills.
- Good understanding of Life cycle sustainability assessment methodology.
- Knowledge in execution of LCAs, specifically with openLCA, would be an advantage.
- Proven IT skills, including MS Office and online collaborative tools.
- Enthusiastic, self-motivated mindset and ability to work independently.
- Fluent command of English, both written and spoken.

Bonus qualities

- Experience in the plastic/food industry would be a plus.
- Certification in any life cycle thinking initiative is advantageous.
- Previous experience in FP7, H2020 projects would be advantageous.

Job details

- Job location – Italy, France or Estonia.
- A complete remote work is also possible but the candidate must be based in Italy, France or Estonia.
- Duration – 6 months.

About Digiotouch

Digiotouch is a deep tech start up providing secure, sustainable Digital Transformation products and services for the European industries using its cloud based, secure Paradise platform and Digiotouch Edge. Since its inception in June 2018, the platform has been utilized by organizations from and beyond Europe. Digiotouch has also received a lot of positive feedback on its platform from the European ICT research communities. This is evident as our ground-breaking activities have received public funding from several EU H2020 and Horizon Europe projects and we were one of the winners of the EU Datathon 2018 competition. Our team is currently composed of its CEO/CTO, a business developer, a full stack software engineer, and an intern.
